

## **Greyton Leiwater**

### **September 2018 to May 2019**

It is time again for the completion of applications for the supply of Leiwater.

An Application form for the forthcoming season is attached or can be obtained from the TWK Office Greyton or TWK website (TWK.gov.za)

It will be understood by all that the drought, which has officially been declared a National disaster, has impacted severely on the ability of the municipality to supply Leiwater on a regular and sustainable basis.

In an endeavour to ensure the fairest possible distribution between all Leiwater users should water become available, TWK has determined upon a number of changes to be made to the operation of the Leiwater system for the duration of the forthcoming Leiwater season.

1. For the duration of the season, if there is sufficient rainfall, **Leiwater will be released and charged for on a month to month basis**, subject to the approval of the 2018/2019 Municipal budget by 31 May 2018.

2. Leiwater users will be **billed in respect of any month in which Leiwater may be released**. In so far as the supply during any one month is concerned, the risk of the supply not being fully sustained for such month must remain that of the Leiwater users, as has always been the case.

3. For the duration of this coming season, **all weekly timeslots will be limited to 30 minutes per Leiwater user**. This should ensure that each user gets a fair share of the Leiwater available and that the Noupoot & Ghobos dams have time to fill up overnight.

In addition to all this, in recognition of the hardships and difficulties Leiwater users faced last season, should it be able to do so, TWK may release and supply Leiwater for short periods of not less than a week at a time during the winter months before the commencement of the Leiwater season in September for users to fill their dams.

Finally, as we all know, the Greyton Leiwater system has historically played a valuable and significant role in the development, growth and popularity of the whole of Greyton. Notwithstanding the devastating drought, which we are all enduring and which still persists, the continued existence of the Greyton Leiwater system remains a treasure and an integral part of Greyton's history, reputation, and future.

Be part of continuing history and tradition of Greyton.

Complete the application form today and submit to Greyton Town Office or electronically [gailgr@twk.org.za](mailto:gailgr@twk.org.za) by 25 June 2018

No late applications will be accepted after the cut-off date.

## **Leiwater Greyton**

### **September 2018 tot Mei 2019**

Dit is alweer tyd om aansoek te doen vir leiwater.

Aangeheg is 'n leiwater aansoekvorm. Aansoekvorms is ook beskikbaar by Greyton Munisipale kantoor of op TWK se webwerf([TWK.gov.za](http://TWK.gov.za))

Dit is verstaanbaar dat die droogte wat amptelik as 'n nasionale ramp verklaar is, 'n ernstige impak gehad het op die vermoëns van die munisipaliteit om gereeld en volhoubare leiwater te voorsien.

Om te verseker dat leiwater regverdig versprei word na alle leiwater gebruikers het TWK besluit om n paar veranderinge te maak aan die voorsiening van leiwater vir die duur van die komende seisoen.

1. Indien dit genoegsaam reën en onderhewig aan die goedkeuring van die 2018/2019 begroting aan die einde van Mei 2018, sal leiwater gedurende die seisoen voorsien en betaal word op n maand tot maand basis.
2. Leiwater gebruikers sal maandeliks moet betaal vir die maand waarin leiwater voorsien is. Die risiko dat leiwater in enige maand nie volhoubaar is nie lê soos in die verlede by die leiwatergebruiker
3. Alle weeklikse tydgleuwe is beperk tot 30 minute per leiwatergebruiker vir die duur van die seisoen. Dit behoort te verseker dat alle leiwater gebruikers 'n regverdige hoeveelheid van die leiwater sal ontvang en Noupoot en Ghobos damme sal tyd hê om te hervul gedurende die nag.

Asgevolg van die swaarkry en probleme wat ondervind is deur leiwatergebruikers die vorige seisoen, sal TWK, indien leiwater beskikbaar is, leiwater vrystel vir weeklikse periodes gedurende die winter maande(voor die begin van die nuwe seisoen) om damme vol te maak.

Laastens, soos ons almal weet, het die Greyton leiwaterstelsel 'n waardevolle en belangrike rol gespeel in die ontwikkeling, groei en gewildheid van Greyton. Ten spyte van die verwoestende droogte wat ons almal raak en wat nog steeds voortduur, bly die voortbestaan van die leiwaterstelsel 'n primêre deel van Greyton se geskiedenis, reputasie en toekoms.

Wees deel van hierdie Greyton geskiedenis en tradisie!

Voltooi die aansoekvorm vandag en handig in by die Greyton munisipale kantoor of stuur elektronies aan [gailgr@twk.org.za](mailto:gailgr@twk.org.za) teen 25 Junie 2018.

Geen laat aansoek sal aanvaar word nie!
